

Project Design Phase
Proposed Solution Template

Date	09/03/2026
Team ID	SWTID-2026-4275
Project Name	SpendWise
Maximum Marks	2 Marks

Proposed Solution Template:

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Beginners often find backend development confusing because many learning examples are either too basic or overly complicated. It becomes difficult to understand how APIs, authentication, and databases work together in a complete backend project.
2.	Idea / Solution description	SpendWise is a beginner-friendly backend project built with Node.js, Express, and MongoDB. It allows users to register, login with JWT authentication, and perform CRUD operations on their data while demonstrating a clean backend structure.
3.	Novelty / Uniqueness	The project combines authentication, database usage, and CRUD operations in a small and easy-to-understand system, helping beginners learn backend development through practical implementation.
4.	Social Impact / Customer Satisfaction	SpendWise supports beginners in gaining practical backend knowledge and improves their confidence in building real-world backend applications using modern technologies.
